HIGHLIGHTS

- Tunable White flexible LEDtape with high CRI that can generate light temperatures from cool daylight to warm sunrise
- · Designed for professional lighting applications with high density and light output
- Available in IP00 and IP68-version
- Best in class optical properties MacAdam 3 / CRI>90
- High quality adhesive 3M-tape on backside for easy mounting on common surfaces
- Long lifetime: L70 = 50 000h ①
- Optimized for high resolution digital dimming 0.1-100% using Welight LED-driver W71XX-series
- Possible to connect 10 meters in series ©

Accessories

- Solder-free connectors and bridges (included)
- Aluminium profiles for linear and corner applications
- · Wide variety of lenses and covers 15°/30°/60°/120°/Asymmetric/Batwing
- Fixed or adjustable mounting brackets
- Optimised drivers to fit every need and application

 $[\]odot$ Tolerance range for electrical and optical data $\pm 10\%$

① Tolerance range for electrical and optical data ±10%
 ② Tolerance range for dimensional data ±1%
 ③ All values for ta = 25 °C / tc = 65 °C
 ② Measured at the beginning of the LEDtape. Exceeding the maximum operating voltage leads to an overload on the tape. This may result in a significant reduction in lifetime or even destruction of the tape.
 ③ Self-cooling at ta ≤ 35 °C
 ③ When connecting 10 meters in series, the supply voltage must be between 24-26V at the beginning of the tape. Lower voltage can cause a significant reduction in light output at the end of length.

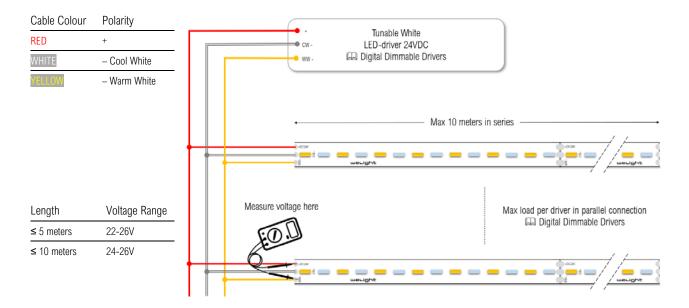

Chromaticity coordinates and tolerances (according to CIE 1931)

The specified color coordinates are measured by a current impulse with nominal values of module after a settling time of 100 msec. The ambient temperature of the measurement is ta = 25 °C. The measurement tolerance of the color coordinates is $\pm\,0.01$.

WIRING

The LEDtape is delivered with colour coded connection cable at each end, L = 1 m, $3 \times 0.5 \text{ mm}^2$ (AWG20). Do not connect more than 10 meters in series and make sure that the voltage is within the specified range at the beginning of the LEDtape.

DIGITAL DIMMABLE DRIVERS

Welight offers a range of suitable LED-drivers especially designed for Tunable White applications.

	Control Signal	Art. Code	Driver Type	Max length per driver
1	DALI-2 DT6	W7101	LEDdriver LCV 100W 24V 1-4CH DALI-2 SR	6.7 m
1	DALI-2 DT8 TW	W7101-TW	LEDdriver LCV 100W 24V DALI-2 DT8 TW SR	6.7 m
1	DALI-2 DT8 XY	W7101-XY	LEDdriver LCV 100W 24V DALI-2 DT8 XY SR	6.7 m
2	KNX	W7102	LEDdriver LCV 100W 24V 1-4CH KNX SR	6.7 m
3	DMX	W7103	LEDdriver LCV 100W 24V 1-4CH DMX SR	6.7 m

DALI DT8-TW DIMMER

If you are looking for a simple yet intuitive way to control your Tunable White installation, we recommend using our driver W7101-TW in combination with our DALI Rotary Dimmer RIO.

Control Signal	Art. Code	Driver Type	Max no of drivers per dimmer
DALI DT8 TW	W7400-DT8-TW	DALI Rotary Dimmer 240VAC 100mA DT8 TW	50

For more details please read the <u>datasheet</u> of the dimmer.

CABLE & CONNECTION ACCESSORIES

					Suitable fo	r LEDtape
Pic	Туре	Art. Code	Description	Included	IP00	IP68

LEDtape Indoor Series IP00

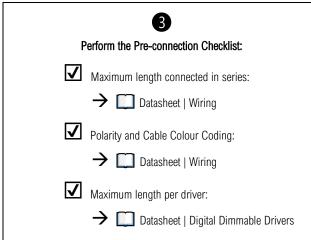

INSTRUKTIONER INSTRUCTIONS ANLEITUNG ISTRUZIONI INSTRUCCIONES

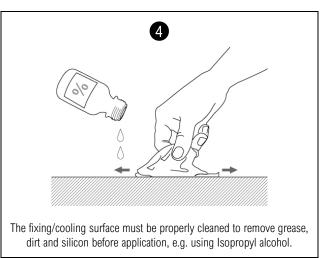

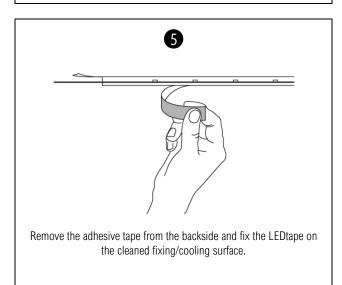

INSTALLATION

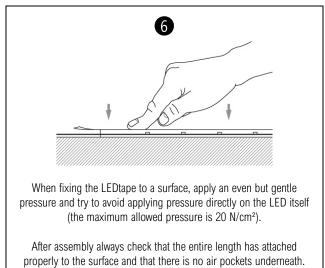

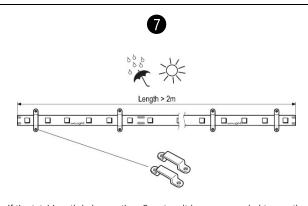

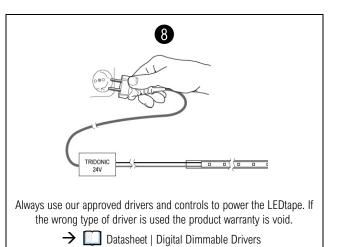

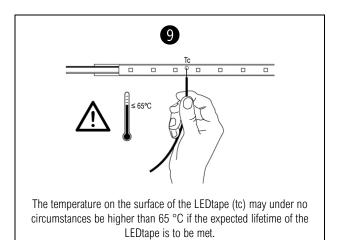

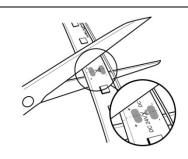

If the total length is longer than 2 meters it is recommended to use the included screw mounting clips in addition to the adhesive tape.

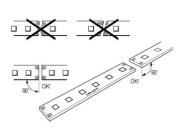

CUT & SOLDER

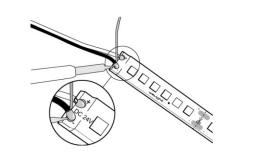

The LEDtape is separable at the middle of every solder pad with the full function of each LED segment. It is only allowed to cut at the indicated cutting line.

Always cut the LEDtape in a straight line $-\,90^\circ$ in relation to the PCB edges. Use Welight's official connection accessories to split, connect, and bridge the LEDtape.

For details on how to solder an IP00 LEDtape, please watch this VIDEO TUTORIAL:

If you need to solder the LEDtape, pre-tin the cables only. Soldering temperature max 300 °C for 4 seconds.

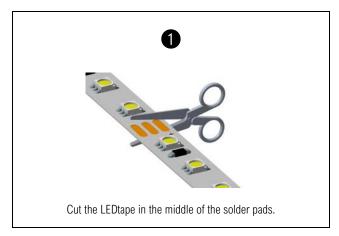

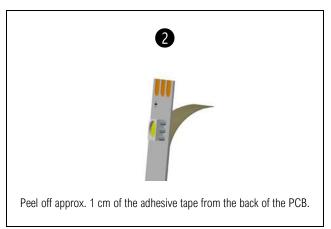

LEDtape TW Indoor Series IP00

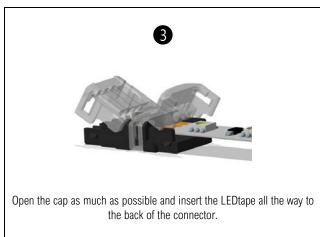

KOPPLINGSDON CONNECTORS VERBINDER CONNETTORI **CONECTORES**

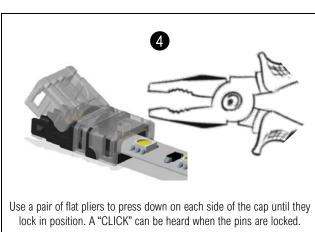

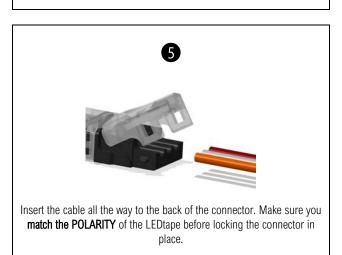

STRIP TO CABLE

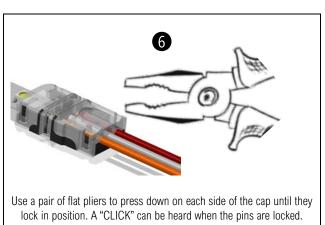

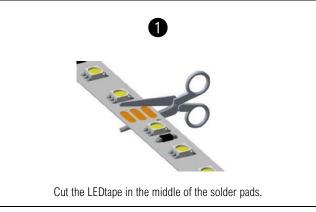

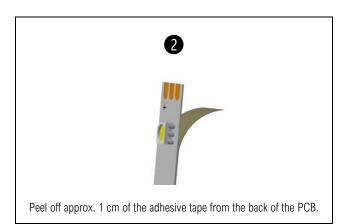

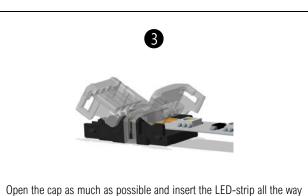

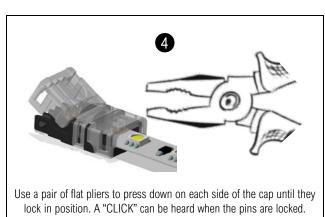

STRIP TO STRIP

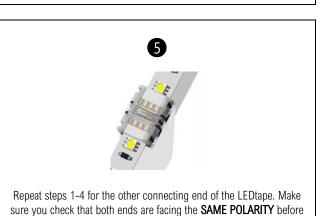

to the back of the connector.

If you are in doubt, consider soldering your connection instead. There is no substitute for a permanent soldered connection.

VIDEO TUTORIAL:

Do NOT use Quick Connectors when...

locking the last connector in place.

× You need to connect a pre-soldered joint.

Your LED strips might be subjected to movement - as in installations on cars, boats, or other vehicles; or in installations that might be installed or set up several times, such as portable shelving or displays.

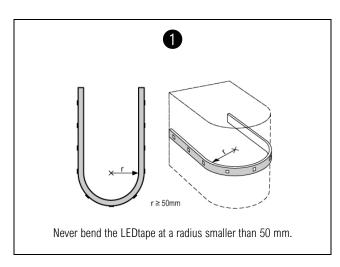

- You have a large number of connections to make particularly in installations that require many connections back to back, where one failure would result in the loss of large sections of light.
- You are installing in tight places when the added size of the connector would make your LED strip installation difficult or impossible.
- Your connectors absolutely MUST NOT fail as in connectors installed in hard to reach places, in products or installations you're delivering or shipping to a customer.

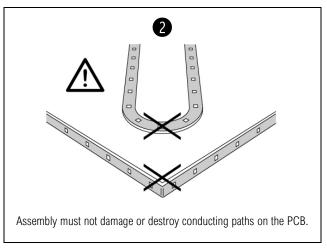

LEDtape Outdoor Series IP68

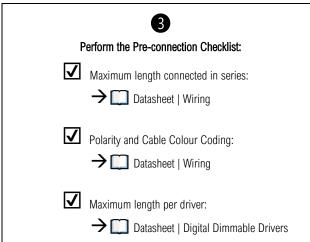

INSTRUKTIONER
INSTRUCTIONS
ANLEITUNG
ISTRUZIONI
INSTRUCCIONES

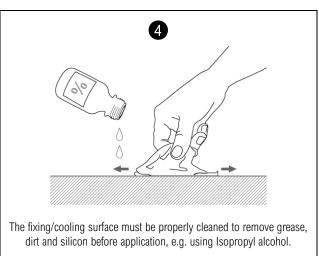

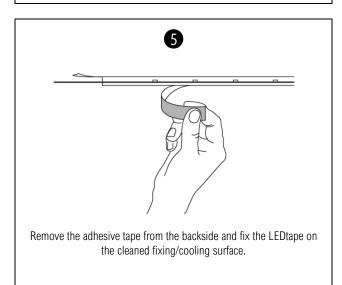

INSTALLATION

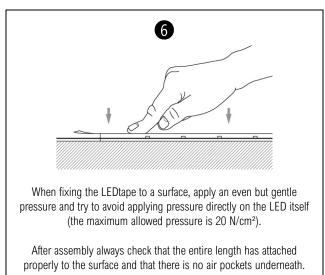

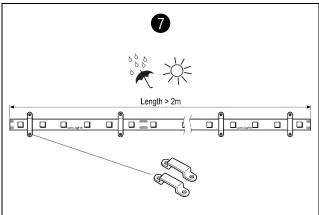

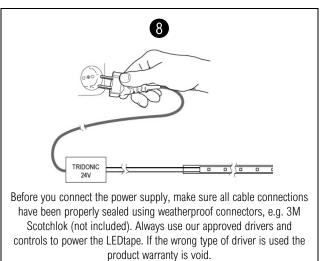

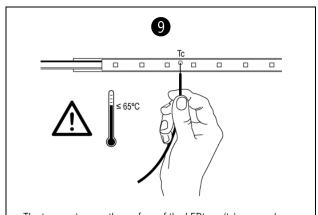

If the total length is longer than 2 meters or when used in environments with large variations in temperature (e.g. outdoor applications) it is recommended to use the included screw mounting clips in addition to the adhesive tape.

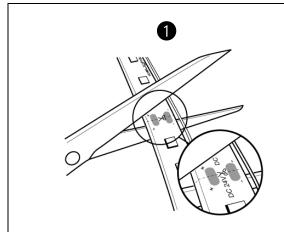

→ ☐ Datasheet | Digital Dimmable Drivers

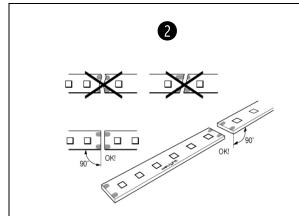

The temperature on the surface of the LEDtape (tc) may under no circumstances be higher than 65 $^{\circ}\text{C}$ if the expected lifetime of the LEDtape is to be met.

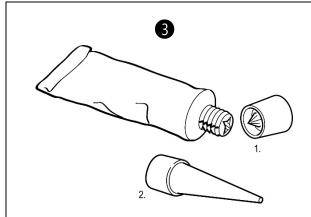

CUT & RE-SEAL

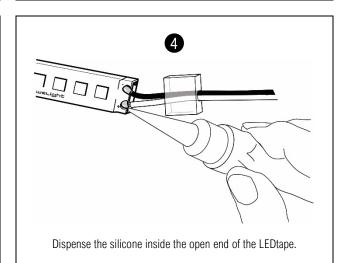

The LEDtape is separable at the middle of every solder pad with the full function of each LED segment. It is only allowed to cut at the indicated cutting line.

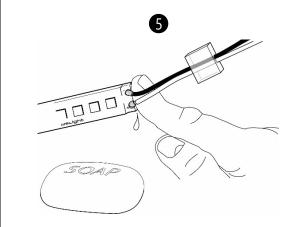

Always cut the LEDtape in a straight line -90° in relation to the PCB edges. Failure to do so can result in damage of the internal conducting paths. Use Welight's official connection accessories to split, connect, bridge and re-seal the LEDtape.

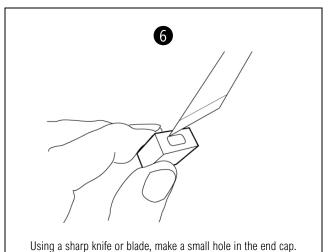

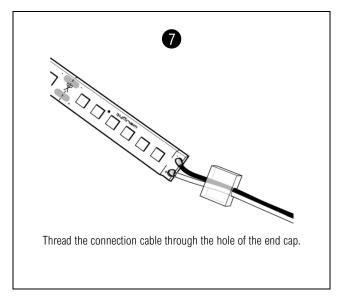

Locate the accessories included in the LEDtape box. Puncture the seal of the tube using the backside of the tube cap. Screw the dispersion needle onto the tube. Cut the top of the needle at an angle of 45-60°.

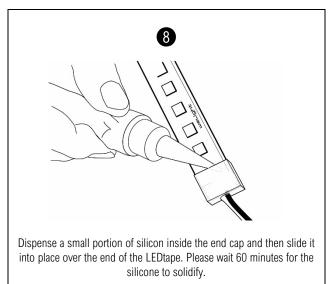

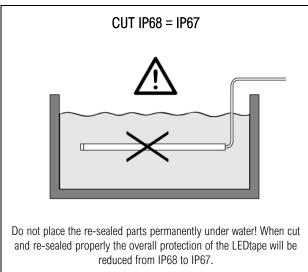

Then use your finger dipped in soapy water to smoothen out the opening creating a solid wall of silicon.

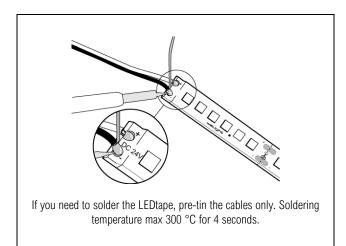

SOLDERING

For details on how to solder an IP68 LEDtape, please watch this VIDEO TUTORIAL:

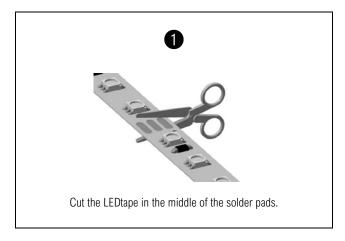

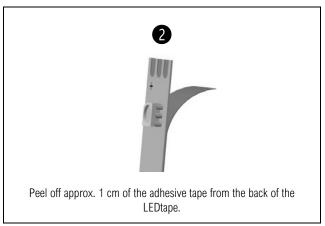

LEDtape TW Outdoor Series IP68

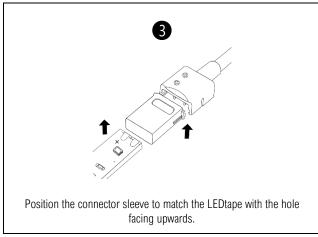

KOPPLINGSDON CONNECTORS VERBINDER CONNETTORI **CONECTORES**

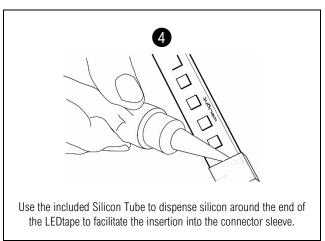

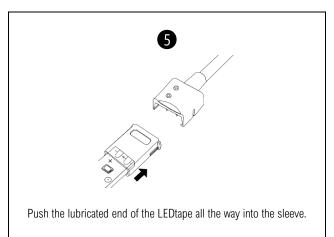

STRIP TO CABLE

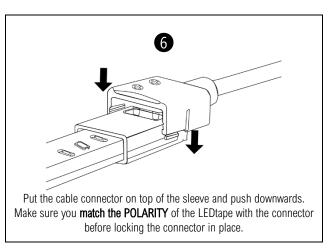

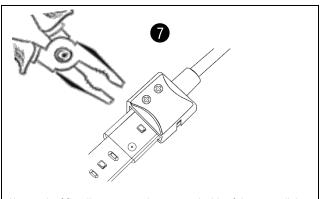

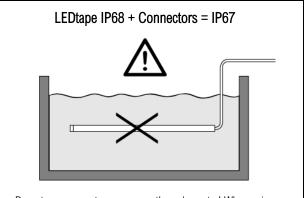

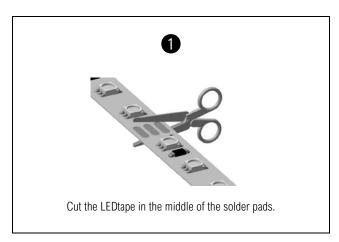

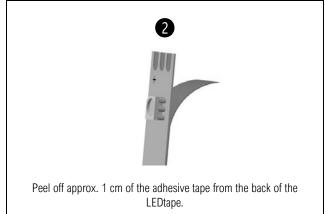

Use a pair of flat pliers to press down on each side of the cap until they lock in position. A "CLICK" can be heard when the pins are locked.

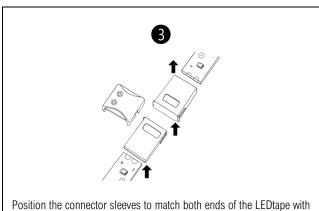

Do not use connectors permanently under water! When using connectors, the overall protection of the LEDtape will be reduced from IP68 to IP67.

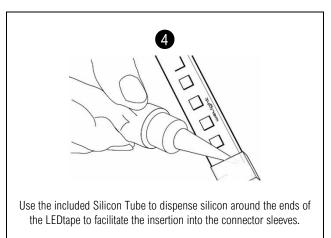

STRIP TO STRIP

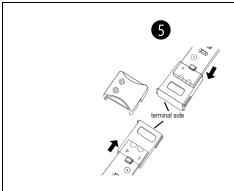

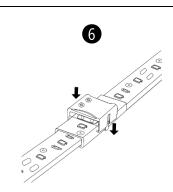

the holes facing upwards.

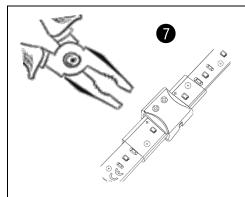

Push the lubricated ends of the LEDtape all the way into the sleeves.

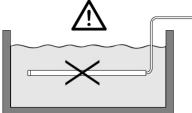

Put the bridge connector on top of the sleeves and push downwards. Make sure you match the POLARITY of the LEDtape with the connector before locking the bridge connector in place.

Use a pair of flat pliers to press down on each side of the cap until they lock in position. A "CLICK" can be heard when the pins are locked.

Do not use connectors permanently under water! When using connectors, the overall protection of the LEDtape will be reduced from IP68 to IP67.

SAFETY INSTRUCTIONS

- Read these instructions carefully before starting the installation and save for future reference. All connections to the device must be made by a qualified electrician or person with the necessary expertise in electrical installation in accordance with relevant rules and standards. Make sure that the mains voltage is disconnected before installation or maintenance.
- Läs dessa instruktioner innan installationen påbörjas och lämna dem vidare till brukaren av anläggningen. All anslutning till enheten får endast utföras av behörig elektriker eller person med kännedom om elektrisk installation i enlighet med gällande regler och standard. Se till att spänningen är frånslagen före installation eller underhåll.
- Lue nämä ohjeet ennen asentamista ja luovuta ohjeet valaisimen seuraavalle käyttäjälle. Kytkennät ohjaimeen saa tehdä ainoastaan pätevä sähköasentaja tai sähköasennukset hallitseva henkilö voimassa olevien määräysten ja standardien mukaisesti. Varmista, että jännite on kytketty päältä ennen asennusta ja huoltoa.
- NO Les disse instruksjonene før du starter installeringen, og gi den deretter videre til anleggets bruker. All tilkobling til enheten skal utføres av godkjent elektriker eller person med nødvendig kunnskap om elektrisk installasjon i henhold til gjeldende forskrifter og standard. Sørg for at strømmen er koblet fra før installering og ved vedlikehold.
- Læs disse anvisninger før du starter installationen og aflever vejledningen til anlæggets bruger. Alle tilslutninger på enheden skal udføres af en autoriseret elinstallatør i overensstemmelse med gældende regler og standarder. Afbryd spænding før installation og vedligeholdelse.
